Document signed by 18 civil society organizations was sent to the State Commission for Environmental Control (Comissão Estadual de Controle Ambiental-Ceca) on 21 September 2016 not to grant an operating license ThyssenKrupp Companhia Siderúrgica do Atlântico (TKCSA). The company has been operating since 2010 without an operating license, only through agreements such as the *Termo de Ajustamento de Conduta* and an Environmental Operation Authorization. The affected communities have since then been reporting several human rights violations such as land, water and air contamination, pollution that affects the health of residents, environmental abuses, broken promises by the company. More information about the Stop TKCSA campaign can be found [here](#) (in Portuguese). If other organizations want to support the cause, please, send an email to: [contato@paretkcsa.org](mailto:contato@paretkcsa.org)

### **Brazil: Treliça video tells the story of people affected by TKCSA in Santa Cruz**

**Author: Instituto PACS — Políticas Alternativas para o Cone Sul**

Watch the full video in english [here](#) and learn about the history of the struggle of the people of Santa Cruz against TKCSA.
